

Introducing the All New *ParsNegar™ II!*

پارس نگار

ParsNegar II screen shot with the On-Screen-Keyboard activated.

Simple, Powerful, Affordable & versatile, that is ParsNegar II for you!

At **International Systems Consultancy** we are very proud to introduce to you **ParsNegar II** (version 2.00). This version is a complete rewrite of the original version 1. It has been designed for the 32 bit versions of Windows® (Windows 95/98/NT). We have raised the status of *ParsNegar* from being a Windows Editor to a Windows Word Processor.

ParsNegar II is a simple word processor with powerful features for Arabic script type languages. You can write letters in your favourite language. You can even use it to **create HTML and RTF files**. Use it with other Windows applications and you will be able to send faxes, email messages, create home pages on the Internet, and create graphical art works and almost anything!

We have built in to the product full support for Persian, Arabic and Urdu languages. We have listened to you and added the features you have been asking for. You can now type your Persian (or Arabic or Urdu) text along with English (or German or French or Swedish etc). You can use different font sizes and styles. You can even embed images in your documents.

ParsNegar II offers:

- Bilingual support (right to left text along with left to right text),
- An On-Screen-Keyboard to allow you easily located and learn keyboard layouts,
- Customable keyboard layouts,
- Rich text formatting features, such as different fonts at different sizes, bold, italic, underline etc.,
- Export to Microsoft Rich Text Format (RTF),
- Export to HTML (Internet and WWW file format),
- Image OLE object embedding,
- Support for diacritics/vowels,
- Undo, Find and Find Next functions,
- Drag and drop feature for your text within ParsNegar and to and from other Windows applications,
- Unlimited amount of text in a document,
- Line wrapping,
- Maximum compatibility with other Windows applications, including those designed for the western versions of Windows,
- Four TrueType fonts and an optional Font Pack add-on, which adds extra 22 fonts to *ParsNegar*.

System requirements:

- 486DX66 or better (Pentium recommended)
- 8MB of RAM (16MB is recommended)
- 6MB of disk space
- Windows 95/98 or NT 4.0 or higher
- 3 1/2 floppy disk drive.

Note: Under Windows NT, NT Administration rights are required to run ParsNegar II. Version 2.00 will only run under the western versions of Windows. Far-East, Bidi and Pan European (eg, Hebrew, Arabic, Greek, Russian, Chinese, Japanese) versions of Windows are not supported in this release.

Introducing the *fantastic* Hafez CD-ROM! A must for every Iranian household...

CD's opening screen

Simply one of the best Persian multimedia CD-ROM titles ever published.

International Systems Consultancy is pleased to offer you this beautiful masterpiece at a great price. We are sure will be impressed with its high quality and craftsmanship. This is by far one of the best pieces of software come out of Iran.

You will treasure this CD for years to come

You can read, print and best of all **HEAR** Hafez's poems right on your PC. The CD-ROM's easy to use interface makes it a pleasure to use and enjoy. You can browse through the poems or search for them in a number of different ways. You can sit back and relax and listen to the great works of Hafez, which is accompanied by Iranian traditional music.

The Hafez CD-ROM offers:

- The complete multimedia collection of poems of Hafez, both in plain text and calligraphic handwriting, along with recitations with background traditional music;
- Faal-e Hafez (فال حافظ) ;
- A number of great and easy ways to search for poems;
- Iranian traditional music by the best voices of traditional Iranian music such as Shajarian (شجریان) along with a screen show of scenic views from Iran;
- Commentaries on some particularly difficult lines of poems, definitions for some keywords;
- A biography of Hafez;
- A collection of great miniature paintings and handwritten collection of poems by famous calligraphers;
- A list of prominent publications about Hafez and his work.

Order the Hafez CD-ROM now!

System requirements for Hafez CD-ROM:

- Windows 3.1, Windows 95 and Windows NT 4.0
- CD-ROM player.
- 4MB of RAM.
- 2MB of free hard disk space.
- Sound card and speaker.
- A 256 colour video driver (16 and 24 bit settings are also supported).

Note: To run the CD-ROM you must set your screen resolution to 640x480 (VGA resolution). Your video driver should also be set to 24 bit or less colours. The colour setting of more than 24 bit colours for your video driver is not supported. These settings can be changed quite easily under Windows 95/NT by right clicking on the desktop and selecting the Properties option.

Visit our web site on the Internet at <http://www.isc.com.au> to take a tour of the CD-ROM and find out about ParsNegar™ and the Font Pack.
